STARTUPS AND SCALEUPS

We are legal and business advisors to innovative startups. As entrepreneurs ourselves, we understand the hard work it takes to envision and develop a groundbreaking product or service. We support startups by handling the legal and fundraising intricacies that starting and growing a business entails.

LEGAL AUDITS AND CAPITAL RAISING READINESS ASSESSMENTS

The fast pace of taking a product or service to market, making improvements, and growing sales, often results in the neglect of legal matters and compliance requirements. This may result in unforeseen adverse consequences. Identifying and addressing potential legal issues, before they become major problems, ultimately saves time and money.

Additionally, it is crucial to be due diligence ready prior to commencing any formal capital raising efforts. Legal structure and governance matters, documents, records, processes and policies are key areas of due diligence by investors and lenders.

Conducting periodic legal audits is an efficient way to protect from potential legal risks, ensure compliance with applicable laws and regulations, and always be ready to raise capital. We are available to perform legal audits and capital raising readiness assessments. We will make recommendations and propose a plan to make improvements to legal structure and governance matters, documents, records, processes and policies.
