R&D TAX CREDITS

We are looking to partner with companies eligible to generate research and development (R&D) tax credits. We can introduce your company to specialty lenders and investors that provide working capital against future tax credits. If your company does not have a Tax Exemption Incentives Grant, we will handle the application with the Incentives Office for you, deferring a substantial portion of our compensation until we monetize the tax credits.

ELIGIBLE R&D ACTIVITIES

- Scientific and technological research
- Development of new products, services or processes
- Development of innovative apps and software

R&D TAX CREDITS

- 50% of eligible investment in R&D
- Demand for tax credits exceeds availability.
- Tax credits may be used as a financing source of repayment or collateral.

ELIGIBLE BUSINESSES ARE SUBJECT TO PREFERENTIAL TAX RATES

- 4% fixed income tax rate
- Fixed 1% corporate income tax rate on products manufactured in PR by using novel pioneer technologies
- 100% exemption on dividends and distributions
- 50% exemption on municipal license taxes, excise taxes, and other municipal taxes
- 75% exemption on municipal and state property taxes
- 75% exemption on municipal construction taxes
